

# SOFTENERS

## A Single System For Your Municipal Water

The A.O. Smith PRO city water system provides the quality water you need for everyday life. This all-in-one solution both softens and filters water to protect your pipes and appliances from scale and mineral deposits, reduce film and residue on glassware, and reduces unpleasant chlorine odors and taste.

### System Features & Benefits:

- **2 Systems In 1:** Softens and filters water thanks to an innovative “mid-plate” design
- **Carbon Media:** Reduces unpleasant chlorine taste and odor and extends the life of softening resin
- **Softening Resin:** Reduces hardness, prolonging the life of your plumbing system and reducing energy consumption
- **Metered Control:** Self-adjusts regeneration cycles based on household’s trend of water consumption
- **WQA Gold Seal Certified:** Provides optimal efficiency and reduced water and salt consumption
- **Service Alarms:** Based on time and/or gallons to optimize maintenance schedules

# SOFTENERS

# A Single System For Your Municipal Water

## Featuring The Vortech® Plate

Vortech Technology creates fluidity of the media bed and extends contaminant removal capacity — meaning fewer regenerations and a significant reduction in water usage.

The system's unique mid-plate design is efficient and performs like two units, accommodating activated carbon and high capacity resin in one tank. The carbon filters water for use throughout your home and protects the softening resin from chlorine degradation.
